S100A2 is a member of the S100 family of proteins. There are at least 10 members in the family, and p11 is only the second member found in the brain. Structure p11 is widely expressed in many tissues. There are alternative variants of p11 from which one of the variants (p11C) is expressed in the brain. p11 has two EF-hand calcium-binding domains. When the protein binds calcium it changes its structure, exposing
